Dashboard page

Notifications	Name	Data	Last update	Address
	x	Click here to access	2024/01/01	X street
	y	Click here to access	2024/01/01	Y street
	z	Click here to access	2024/01/01	Z street

+

- The dashboard looks like a simple table as shown above.
- User can add more row by clicking on + sign. It pops up a form in which the user enters the info and click ok.
- The color of notification dots can change based on a value that comes from the websocket interface from Home Assistant.
- The notification dots are clickable. Once clicked a pop up window shows details of the notification in writing.
- The Data link ([click here to access](#)) just opens a new tab with a saved URL.
- The last update date is set based on the last incoming web socket traffic.
- There might be some more information added later.
